## The Creation of the Common Law The Medieval Year Books Deciphered

In this modern compilation and commentary, the most important medieval cases are paraphrased and analyzed, making this interesting and entertaining litigation accessible to everyone. Although Maitland's classic *History of English Law* ends at Henry III's death, until now no one has explained in clear modern language the transformative events that followed. After Edward I became king, Chief Justice Bereford took charge of the legal system, and created law in accord with his own sense of justice. The book puts his innovations into the context of contemporary American and English law.

THOMAS LUND, a Professor at the S. J. Quinney College of Law, University of Utah, was educated at Horace Mann School, Harvard College, and Columbia Law School. His Oxford University D. Phil. thesis was published as *American Wildlife Law* (1980). An *Environmental Affairs* review described Lund as "probably the leading authority on the history of wildlife law." Lund has written about medieval law for many years.

It is a staple of popular fiction — *The Da Vinci Code* is a prominent recent example — for a scholar, after inspired and painstaking work, to reveal hidden mysteries encoded in ancient manuscripts that alter our understanding of ourselves and our civilization. Remarkably, the legal scholar Thomas Lund, has, in real life, done just that. Here, after hundreds of years, is a readable, brilliant, and deep study of the sources of the basic principles of the Anglo-American Legal System still in use today — the medieval Year Books — until now utterly inaccessible except to a few specialists in the most arcane legal history. This amazing and delightful book will be of profound interest to anyone who has ever believed that the rule of law is about more than the arbitrary machinations of politicians. **Simply stated, Thomas Lund has given us one of the most important works on law in this generation.**

The goal of Thomas Lund's *Creation of the Common Law* is to render a selection of material from the Year Books accessible to an educated lay audience, which wants to understand how medieval English law actually worked. He has performed his task with a clarity and economy that are admirable—and with a certain beguiling whimsy. **The book is altogether a stunning achievement and will be especially valuable for the light it throws on subjects dear to the hearts of medievalists who are not in themselves legal specialists, indeed, who have tended to avoid the linguistically forbidding Year Books.**

**An innovative invitation to the fascinating world of the medieval English Year Books.** Professor Lund opens this vast range of law reports to the scrutiny of students of modern as well as medieval law. Within his book, Chief Justice Bereford and Christopher Columbus Langdell meet to provide a highly original schooling in the early Common Law.

**Modern lawyers and laypeople are often daunted by the inaccessibility of the early sources... It is for just this reason that this masterful compilation and commentary by Professor Thomas Lund offers such a great contribution to the study of the history and evolution of our legal culture....** On topic after topic, reading the colloquies at the bench, we can see all the players jockeying for rhetorical advantage.... One of the great joys of Lund's writing is that he casts these materials as part of a complex narrative, organized by topic. Beautifully encapsulated in paraphrase, the cases preserve the urgency and spontaneity of the arguments.... Treat the book as a series of connected episodes that can be read in large or small chunks. Open up to any page or section, read for amusement and enlightenment, and then return to the larger text on some future day. These materials are rich, and they will richly reward those who are willing to work their way through them.

Reprint of first edition. Sir Robert Brooke [d.1558] was renowned for his great learning and probity as a judge. His Abridgement is based on Fitzherbert's Abridgement, but it contains much new material. In all, Brooke abridged nearly 21,000 cases and digested them alphabetically under 404 headings. It abridges fully the Year Books of Henry VII and Henry VIII. Brooke proceeded with great care and accuracy, and is believed to have had access to the original records of the Year Books. Coke calls the Abridgement "a worthy and painful work and an excellent repertory or table for the Year Books of the Law" (cited in Marvin's *Legal Bibliography* 151-152).

## The Year Books

**Or Reports in the Following Reigns,  
with Notes to Brooke and Fitzherbert's Abridgments**

Originally published: London: by George Sawbridge, [etc.], 1678, 1679-80. 11 vols. Folio (9" x 14").  
5,802 pp.

Reprint of the Vulgate edition, with new detailed introductions that address the history, content and significance of the Year Books, and tables that list all justices and sergeants, as well as calendar years of law terms.

It is difficult to overestimate the importance of The Year Books. As Marvin put it in his *Legal Bibliography* (1847), these were the "venerable books" from which Littleton, Hobart, Hale and Coke drew "so much valuable ore, melting it into ingots and refining and sending it abroad as the correct coin of the common law" (756). As a series of notes on debates and points of pleadings they are primary sources for our knowledge of medieval common law.

The origin of The Year Books is unknown. Maitland believed that the earliest volumes were notes taken by law students in court copied for the use of pleaders in later cases. Holdsworth maintained that The Year Books, like other law reports, were records of cases made by lawyers for their own private use with no thought toward subsequent publication. Though it is not known when the first volumes were compiled, it is clear that the earliest cases date from 1268; the printed series continues to 1535. The first Year Books were printed in 1481-1482 by William de Machlinia. The Vulgate edition was published between 1678 and 1680; it remains the standard edition.

This edition is noteworthy for the inclusion of Coke's complete prefaces. Sir Edward Coke [1552-1643] was considered to be the greatest legal practitioner of his day. Written between 1572 and 1616, The Reports are not reports in the conventional sense but highly detailed anthologies of precedents organized according to the cases they consider. A work of immense authority, it was often cited as *The Reports*, there being no need to mention the author's name.

### Abraham Fraunce The Lawiers Logike Exemplifying the Praecepts of Logike by the Practice of the Common Lawe

Originally published: London: William How, 1588. xxxvii (iii-xxvii new introduction), [xiv], [151] leaves (total 364 pp.).

Written in 1588, *The Lawiers Logike* is the first legal treatise to apply the tools of logic to legal argument. This was a controversial and new concept at the time because its thesis contrasts with common law and its unmethodical and disorganized approach to law. Its influence is still felt. It is a unique work in which Fraunce castigates "lazy lawyers" and mixes illustrations from poetry and prose with often quite technical illustrations from law treatises and case reports. In his introduction, Steve Sheppard points out that this "work informs three fields of American law: the study of legal analysis and argument, the intersection of law with other disciplines, and the moral justification of law itself." (Introduction, iii).

**Charles Viner**

**A General Abridgment of Law and Equity**

Alphabetically Digested Under Proper Titles, with Notes and References to the Whole

Originally published: Aldershot: Printed for the Author, 1742-1753

Reprint of the first edition. Descended from Rolle's *Abridgment*, Viner's magnum opus marks the end of an era in English legal bibliography. Originally intended as a continuation of D'Anver's abridgment, which ends at "Factor," Viner's work went on to become the longest and most detailed work of its kind. According to Winfield, "[i]t is the megatherium of the older abridgments...For several years we have used Viner for the purpose of getting all available references to all existing cases on three or four branches of the law, and we have found his book very useful." Marvin

adds that "it is a vast Index of the law" that "often rewards the labour when all other resources have failed." In addition to the Abridgment, Viner [1678-1756] contributed much for the study of English law through his posthumous establishment of the Vinerian chair and Vinerian scholarships. The first holder of the Vinerian Chair was Sir William Blackstone. During his tenure he delivered the lectures that formed the basis of his *Commentaries on the Laws of England*.
